Additional Backup Information

This contract is for the purchase of two replacement Ford Escape 4x2 Hybrid SUVs, sixteen new and fourteen replacement Ford Escape 4x4 Hybrid SUVs, and three replacement Ford Fusion Hybrid sedans. These vehicles will be used by various City Departments in the day-to-day operations of City business.

The Austin Climate Protection Program team and Fleet staff have worked together to develop a vehicle purchasing process in our progress towards our citywide objective of obtaining carbon neutrality by 2020. The development of the purchasing criteria incorporates emissions impact, available technologies on the market, physical demands on the vehicle, and service application. These criteria are applied to all vehicles submitted to Fleet for purchase.

All of these vehicles are powered by hybrid-electric technology. Improving the fuel economy of the vehicle also reduces greenhouse gas emissions in line with the amount of fuel not consumed.

The vehicles in this RCA have been recommended for purchase utilizing a process that involves the Fleet Officer, affected Department Directors, and Assistant City Managers (ACMs). ACM approval is required for all new additions to the City's fleet prior to any requests being made to the Purchasing Office.

Departments review the list of vehicles determined eligible for replacement by Fleet Services based on mileage, hours of use, and maintenance costs. From that list, priority uses were determined within the departments, and the proposed equipment was reviewed by the Fleet Service Center Manager to insure the specified vehicle is appropriate for the use.

All of these replacement vehicles have met the Fleet Officer's eligibility criteria for replacement. The Fleet Service Center Managers have inspected each vehicle to be replaced, and determined that the mileage or hours of use of each vehicle proposed for replacement cannot be increased without risking a significant increase in repair costs and loss of productivity due to down time.

The vehicles in this purchase will be assigned to the following City Departments:

Austin Energy

1 Escape 4x2 – New

1 Fusion Sedan – Replacement

2 Escape 4x4 – Replacements

Austin Water Utility

2 Escape 4x2 – Replacements

Austin Fire Department

1 Fusion Sedan – Replacement

Fleet Services Department

1 Fusion Sedan – Replacement

Neighborhood Planning and Zoning Department

6 Escape 4x2 – Replacements

Public Works Department

21 Escape 4x2 – 15 New, 6 Replacements

In the interest of validating the best use of the City's acquisition funds, as well as the impact of local purchase versus using a cooperative procurement, the City conducted a "Best Value" bid solicitation for light-duty hybrid vehicles.

The best-value criteria included the cost of the vehicles (80 of 100 points), local economic impact (10 of 100 points), and number of days the bidder will offer firm prices after initial award (10 of 100 points). Points for local economic impact were assigned based on the bidder's answer to two (2) questions: a) Is your business located in the Greater Austin Metropolitan Area and b) State the number of people you employ in the Greater Austin Metropolitan area.

The results of this solicitation were compared with price quotes from the available cooperatives.

The price offered by Philpott Motors, through the BuyBoard Cooperative, is \$25,865.50 less than the best-value bid received from a local vendor that responded to our best value solicitation.

The Philpott Motors contract offers the lowest price and is able to provide vehicles that fully meet the needs of the using departments. Philpott Motors is contracted through BuyBoard to supply these types of vehicles to other public entities statewide as a result of a competitive bidding process. Utilizing BuyBoard contracts provides for volume discount pricing as well as the earliest opportunity to place the City's vehicles on order.
